

Eaton Visual Power Manager

Eaton's new Visual Power Manager (VPM) software provides IT managers of data centers and distributed IT environments the tools to remotely monitor their power devices—including all UPSs and PDUs. An HTML5-based platform, VPM is easy-to-deploy, simplifies day-to-day monitoring and helps maintain business continuity.

Our comprehensive reporting software saves you time, allowing you to stay on top of power management while focusing on the bigger picture—running your IT infrastructure. VPM helps you monitor power equipment, supply predefined and custom reports, initiate mass firmware and configuration commands and deliver a visual layout of your data center and IT environment, making it simple to stay in-tune with trends in your environment while identifying and resolving any issues.

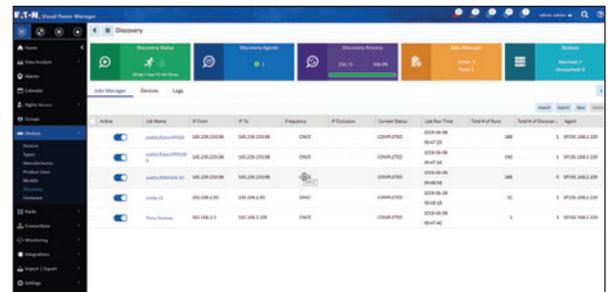

VPM key features:

Power infrastructure monitoring

Up-to-the-minute statistics and reporting provides a quick way to identify potential issues, allowing you to quickly take corrective action.

With VPM, you receive:

- **Real-time alarms** to help with power infrastructure monitoring
- **Increased awareness** with reports, trends and dashboards
- **Remote access to monitor and control** your devices from anywhere
- **Customizable user access** for multitenancy and feature access limitation
- **Control of rack PDU outlets and UPS load segments**
- **Customer billing/chargeback** reports
- **View outlet and rack power capacity**, as well as power events
- **View your phase balancing** at rack level
- **Predefined trend charts** for anomaly identification and analysis
- **Simplified budget planning** with integrated battery replacement reports

Auto-Discover your networked power devices with SNMP Protocols for quick and easy monitoring and management

Trend your data points over configurable periods of time to identify changes and irregularities in your power infrastructure

Alert	Alert Name	Severity	Action	Alert	Last Occurred	Location	Actions

VPM licensing levels:

Eaton Visual Power Manager (VPM) offers two levels of licenses.

VPM Essential is a self-installable, subscription-based license that offers users essential power management capabilities in a simplified interface for a competitive price.

VPM Professional offers the ability to visualize infrastructures with asset management and location-based analytics to take necessary actions for continuous uptime of critical applications. See the chart and links below to determine which license suits your environment.

Compare VPM licenses

Features	VPM Essential	VPM Professional
Maximum monitored devices supported Note: Based on standard architecture, more can be achieved with evaluation by Eaton.	Up to 1,000	Up to 500,000
Fully HTML5 web interface	✓	✓
Auto discovery	✓	✓
Mass firmware upgrade tool	✓	✓
Mass node-settings configuration tool	✓	✓
Send email notifications	✓	✓
Monitor third-party devices	✓	✓
List-based asset catalog	✓	✓
Event-based automation	✓	✓
Integrated reporting engine	✓	✓
Microsoft active directory integration	✓	✓
Supports LDAP authentication	✓	✓
Dashboard with trend analysis	✓	✓
Multi-tenant user access control	✓	✓
Self installable virtual appliance	✓	
Location based navigation		✓
Visual, map-based alarm status		✓
3D rack elevation builder		✓
Rack group aggregated data analytics		✓
Intelligent single click, remote device power cycling		✓
Power aggregation through the power chain		✓
ITSM integration (ServiceNow, Remedy, etc.)		✓

Professional services:

Let our experts assist you in deploying your platform. We offer services from remote installation assistance to full, on-site implementation.
